

Set up an account for OpenStreetMap

- Please use a browser like Chrome, Firefox, or Safari.
- Go to openstreetmap.org
- Click on [“Sign up”](#). Follow the prompts.
- A confirmation email will be sent to the address that you provided. Please log in to your inbox and confirm your new OSM account.

Select an area to map

- Go to the HOTOSM tasking manager, and select the following task:
- Don't see your username in the top-right corner? Click [“Log in to OpenStreetMap”](#) and follow the prompts.
- To get started, click on a square on the map that is not green (complete) or yellow (in-progress).
- Click [“Start Mapping”](#).
- Select [“Edit with iD editor”](#).

Map the area

- You will be tracing buildings and roads within the fuschia square.
- To add a building: click on the [“Area”](#) button and trace the building outline. Double-click to finish.
- To classify the area: on the left side of the screen, click [“Building”](#), then scroll down and click [“Building”](#) again. The building you traced will turn red.
- To add a road: click the [“Line”](#) button and trace the road. Make sure it connects to other intersecting roads.
- To classify the line: on the left side of the screen, click [“Road”](#), then a subcategory.

Save your work

- Click the [“Save”](#) button at the top of the map area.
- On the left side of the screen, click [“Save”](#) again to confirm.
